**Unlock Business Value from Data**

## About us

We provide innovative IT solutions to business challenges. The new economy demands faster, more mobile capabilities, whilst ensuring that every dollar spent has a return on its investment. Soltius is committed to delivering IT.

It offers integrated end to end implementation services that enable organizations to analyze data, generate insights and ultimately value. Our strength in diverse Business Intelligence tools together with our experience of delivering successful BI implementations in several countries and across multiple industries makes us a reliable and suitable business intelligence partner, we not only cater to our client's existing needs but accommodate the innovations and emerging trends and re-invigorate their Business Intelligence initiative, making it more appealing, insightful, and actionable.

## What we Do

To achieve and sustain your desired goals, it is important to close the gap between strategy and execution. Soltius services and solutions help you in using and implementing methodologies, software, tools, frameworks and proven practices that can support a range of initiatives from the most strategic analytic journeys to focused analytical implementations.

## Quick Facts

- ▶ Implementing BI in the MENA region since 1996
- ▶ Focused Business Intelligence and EPM competence
- ▶ Localization carried out for all GCC countries
- ▶ Established itself as Go-To partner for SAP BI

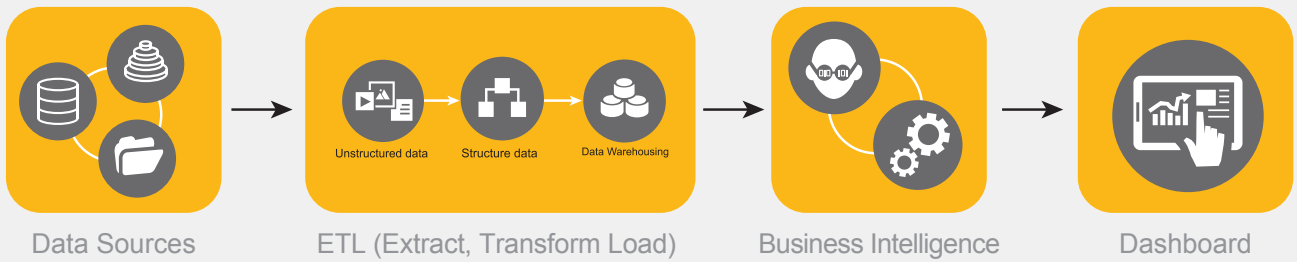

## SAP Business Objects Business Intelligence (BI) platform

Provides flexible systems management for an enterprise BI standard that allows administrators to confidently deploy and standardize their BI implementations on a proven, scalable, and adaptive service-oriented architecture.

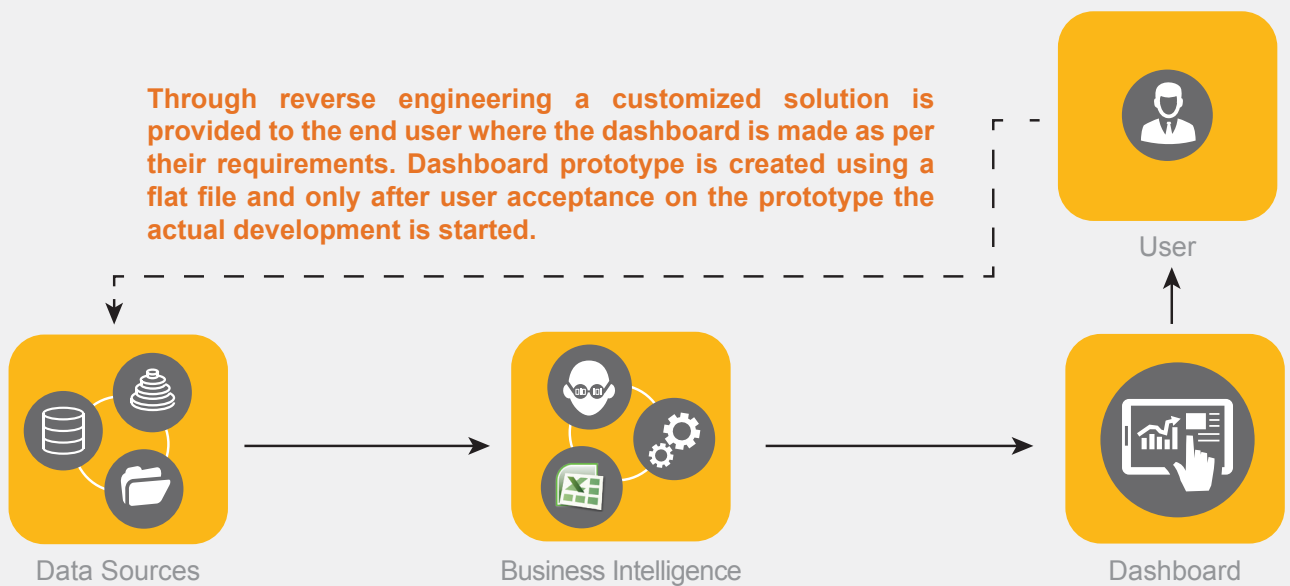

## Our Competence

## ■ Visualized Deployment Methodology

The **Conventional Deployment** is a 'Big Bang' approach where the users get to see the end results only after data warehouse and data marts are ready. This leaves a gap between user expectations and realized system.

Through Visualized deployment we seek to trigger the thinking mechanism of the business user by supplying them with a base structure dashboard. This method does not take extensive time and effort to develop. Also, the changes are made as per user requirement with ease.

## ■ Benefits

Single Point of Truth

Less total cost of ownership

Distribution of Trustworthy Data

A warehouse to support future technology

Integration with Non SAP Databases, Excel Files and Other Enterprise Applications

Quick and timely report delivery

Standard SAP reports, cubes and analysis scenarios from SAP and Soliuis. 10 years proven content and KPIs from over 20,000 SAP installations

## ■ Industry Experience

Healthcare

Banking

Energy

Pharma

Telecom

Public Sector

Aviation

FMCG

Retail
