Our services

- Determine how mobile technology adoption will impact your organization

■ Enterprise Mobility >> Solution Development

Soltius offers comprehensive solution framework that addresses the mobility requirements of enterprise use cases on boarded to SAP Business Management Software Solutions.

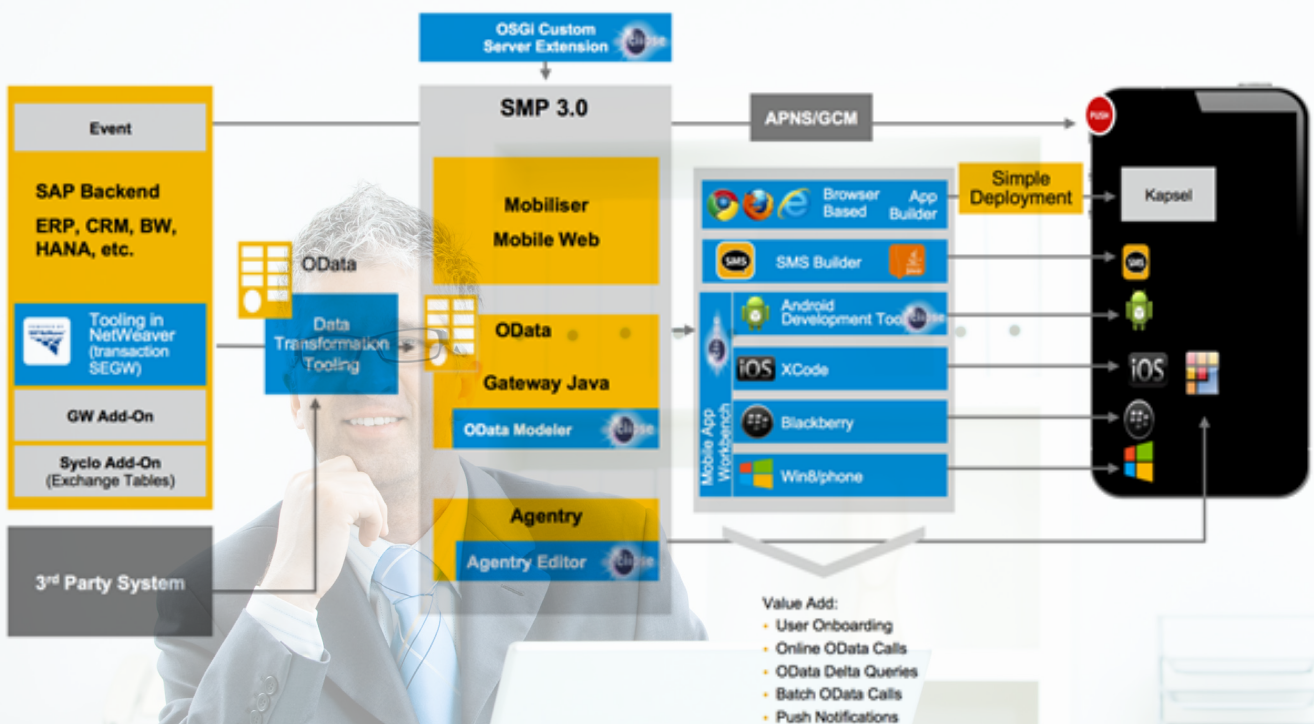

■ Key features

- ▶ **Broad set of Platform services:** To deliver a cost-effective solution for designing employee, business and consumer mobile apps, SAP Mobile Platform shall not require re-engineering of processes, resources or existing infrastructure.
- ▶ **Open, Standards Based Platform:** To provide a premier user experience for developers without requiring training on new tools, SAP Mobile Platform is intended to offer a future-ready architecture based on open-standards and open-source technologies that incorporate the latest mobile technologies.

▶ **Unparalleled Developer Productivity:** To optimize productivity while helping reduce development time and maintenance costs, developers shall still be able to choose their preferred development tools, augmented with software developer kits (SDKs) provided by SAP and libraries for building native and hybrid apps.

▶ **Unified Cloud offering for faster, Simpler Innovation:** The cloud version of SAP Mobile Platform 3.0 is built on the SAP HANA Platform, an open, standards-based platform-as-a-service (PaaS) that shall allow SAP customers and partners to build and deploy custom applications in SAP data centers around the world.

Industries Expertise: Healthcare, Banking and Financial, Oil & Gas, Manufacturing, Public services, Whole sales & Distribution and Engineering Procurement and Construction.
