Service Overview

Soltius is enabled to service your organization across the full spectrum of IT services which are required to evaluate, implement and support your complete business model.

Soltius ME

Soltius Middle East is committed to delivering innovative IT business solutions to like minded organizations throughout the Middle East.

Soltius focuses on SAP implementations, continuous improvement, and application management support.

Specific competence has grown in the areas of Human Capital Management, Business Intelligence, Mobility and Healthcare.

Soltius has been present in the Middle East since 2005, and has a business model of building local competence based on its international network.

We are associated to the global Soltius Family, which spreads across Asia Pacific from New Zealand and Australia through South East Asia into the Middle East Region.

Consultants:

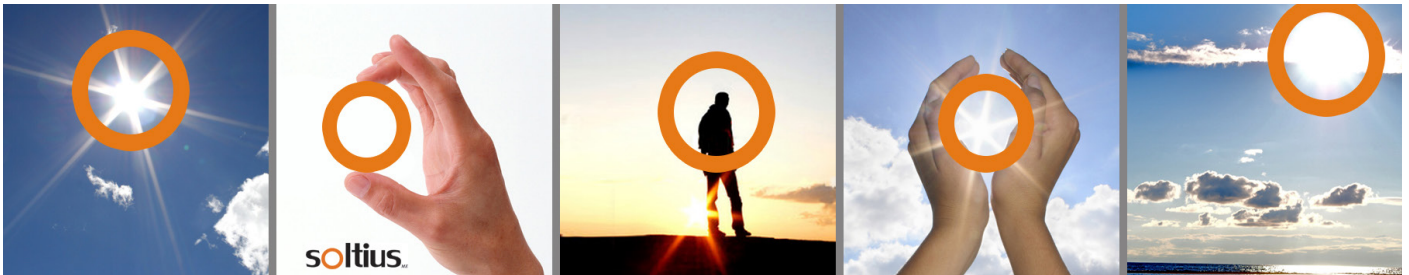

soltius has a team of locally based client facing consultants who work with our customers to identify the measurable benefits that can be achieved by implementing business solutions based on Enterprise Resource Planning (ERP) Tools. Our consultants have a deep knowledge of ERP and industry domain knowledge which, when combined with their enthusiasm for quality and commitment to success, ensures that only the very best solutions are delivered to the clients.

Clients:

Our clients are typically medium to large size companies for whom we design, develop and implement solutions that can cover one end to end process for one part of the organisation, through to complex integrated processes for the entire institution. The long term partnerships that we have created with our clients based on trust and value add is the very evidence that we are committed to their success. We have come a long way in the 6 years since we first started working in the region, but our relationship have stood the test of time.

Customer Centric SAP Consultancy Service

When Highly motivated and creative people, from diverse backgrounds, share a vision to achieve excellence and create value for stakeholders, a new form of energy is unleashed. We call this phenomenon SOTIUS (Pronounced Sol-shus)
