Unlock Business Value from Data

About us

We provide innovative IT solutions to business challenges. The new economy demands faster, more mobile capabilities, whilst en-suring that every dollar spent has a return on its investment. Soltius is committed to deliv-ering IT.

Soltius offers integrated end to end imple-mentation services that enable organizations to analyze data, generate insights and ulti-mately value. Our strength in diverse Busi-ness Intelligence tools together with our ex-perience of delivering successful BI imple-mentations in several countries and across multiple industries makes us a reliable and suitable business intelligence partner, we not only cater to our client's existing needs but accommodate the innovations and emerging trends and re-invigorate their Business Intel-ligence initiative, making it more appealing, insightful, and actionable.
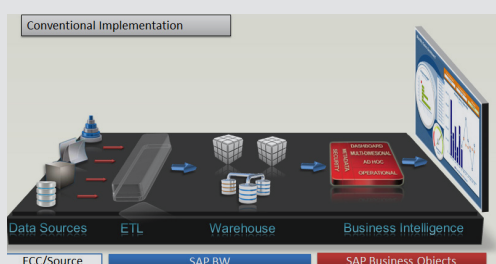

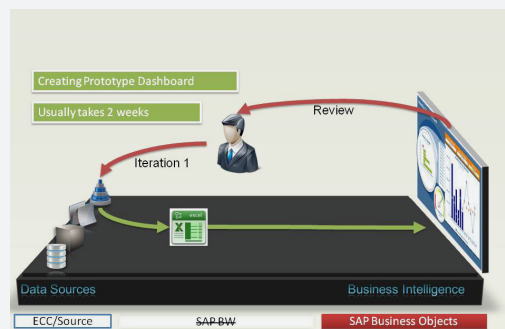

■ SAP BI: Closing the gap between strategy & execution

To close the gap between strategy and execution, IT strategy needs to support overall corporate strategy. Business users need actionable and timely data to do so while IT can't be bogged down with addressing data issues rather than focusing on it's core competency. This is where SAP Business Intelligence comes into play: Make actionable plans and track progress like never before; discover and analyze hidden trends; make your organization nimble and agile

■ Visualize Deployment Method

Conventional BI deployment is predicated on documented requirements of business users. Their translation into a dashboard often results in gaps: firstly analytical ideas generate once the business users sees the dashboard and secondly changes are almost always required once the dashboard is built.

Visualize deployment is an agile methodology incorporating rapid, iterative and visual development techniques that fully engage the end users to optimally align with their objectives: Dashboard is built as a first step using excel data and existing reports and requirements are finalized in dashboard form. The remaining deployment is done using reverse engineering

■ Business Benefits

Rich BI functionality

charts, drill down and across reports; filter, and format data; model scenarios visually

Data Warehousing – Get a flexible dataware housing platform which is comprehensive, ro-bust and not only caters to current require-ments but supports future information man-agement needs

Best practices – Rely on proven methods for sales, service, financial, manufacturing and procurement analysis with prebuilt reports and dashboards

Increase agility and transparency with visi-bility into trends and variances and insight in-to their causes

Speed adoption and reduce training and sup-port costs

Drive up revenue per employee by analyzing and maximizing resources

- ■ Enterprise Applications
- ■ Pre Built Industry Models
- ■ Oracle EBS
- ■ Symbols
- ■ TCSS
- ■ Siebel
- ■ Siebel CRM
- ■ Sidaat Hyder Sec-ondary Sales

■ Our Differentiators

Customers

Mahatma Gandhi once said, "A customer is the most important visitor on our premises. He is not dependent on us. We are dependent on him. He is not an interruption in our work. He is the purpose of it. He is not an outsider in our business. He is part of it. We are not doing him a favor by serving him. He is doing us a favor by giving us an opportunity to do so."

We approach all our engagements from a business value perspective. We know, that our custmers need to see value in us. It is the business value proposition that drives investment in information technology solutions. We identify all benefits up front so that clients can do post implementation audits and ensure that real business value has been obtained from their investments. We are proud that over 60% of our business is from repeat business.

Consultants

We have consultants who are industry experts. Specific industry experts for the healthcare, Oil and Gas, Aviation, Manufacturing, etc who understand the benefit of cutting edge technology in the industry.

Moreover, We do not employ trainee consultants straight from college. All our consultants have been in industry before joining the information technology business. It is this cross between industry knowledge and IT savvy that creates true value for our customers.

Partners

We understand that having the best technology isn't enough if you don't have the right partners deliver the technology to right set of customers. Like minded partners are important for our business.

Additionally, we activity participate in improvement workshops with our partners to ensure that we are always at the leading edge of thought and technology. It is through our implementations and first hand experience that we believe we have the added advantage to advise our partners in the development of their products for the benefit of our mutual clients.

Presently, we operate through set of partners globally and would invite more technology partners. In case you feel we can synergise our efforts for better results, please follow the below link and share your idea and view on how we can work together
